

Classroom Attendance Management System

User Guide

1. Introduction

The Classroom Attendance Management System is designed to record, and manage student attendance efficiently. It replaces manual attendance methods with automated tracking, improving accuracy and saving time.

The system supports multiple users such as students, teachers, and administrators, each with specific roles and permissions.

2. System Overview

The system allows:

- Recording attendance in real-time
- Managing students, classes, and courses
- Generating reports and analytics
- Viewing attendance history

3. User Roles and Permissions

Student

- View personal attendance records
- Check attendance percentage
- Mark attendance

Teacher

- Take attendance for assigned classes
- View student attendance lists
- Generate reports for classes

Administrator

- Manage users (students & teachers)
- Create and manage classes

- Access all attendance reports

Access is role-based, meaning each user only sees features relevant to them.

4. Getting Started

4.1 Login

1. Open the system
2. Enter your username and password
3. Click **Login**

4.2 Dashboard

After login, users see a dashboard with:

- Quick overview of attendance
- Navigation menu

5. Main Features

5.1 Attendance Recording

- Teacher selects class
- Generate a code for the session
- Marks students as:
 - Present
 - Absent
 - Excused
- Save attendance

Attendance can be recorded instantly using Qr Code, reducing manual errors.

5.2 View Attendance

Users can:

- View daily attendance
- Check attendance history
- Filter by date, subject, or class

5.3 Reports & Analytics

The system generates:

- Daily reports
- Monthly summaries

- Attendance percentages

Reports help identify patterns like absenteeism.

5.5 Class & User Management (Admin)

- Add/delete students
- Assign teachers to classes

6. Typical Workflow

Teacher Workflow

1. Login
2. Select class
3. Take attendance
4. Save
5. View reports

Student Workflow

1. Login
2. View attendance
3. Track percentage

Admin Workflow

1. Manage users
2. Monitor attendance
3. Generate reports

7. System Benefits

- Saves time (no manual roll call)
- Reduces errors
- Provides real-time data
- Improves student monitoring

Automated systems improve efficiency and provide accurate, up-to-date attendance records.
