

Usability Evaluation Report

No	Heuristic	Description of the Issue	Screenshot	Severity	Suggested Improvement
1	H1-1: Simple & natural dialog	Important controls (student list & “Mark All Present”) are hidden unless the window is maximized		2	Make layout responsive or add scroll
2	H1-2: Speak the users’ language	Technical terms like <i>HTTP 500</i> , <i>token</i> , <i>daemon</i> shown to users		3	Replace with user-friendly messages
3	H1-3: Minimize users’ memory load	QR workflow forcing manual transfer between users		3	Provide more detailed information or a way to filter by class
4	H1-4: Consistency	Icons are inconsistent, some pages have emojis some svgs		2	Standardize styling
5	H1-5: Feedback	Class filter does not update data or show feedback		3	Add loading state + refresh results
		Some screens lack a clear Back to dashboard option however sidebar for navigation is			Add visible navigation options such

6	H1-6: Clearly marked exits	always visible		1	as “Back”
7	H1-7: Shortcuts	Too many steps to view attendance for specific class and session		2	Add recent class shortcut to view that specific attendance
8	H1-8: Precise & constructive error messages	Errors are technical, unclear, and not actionable		3	Make errors short, precise and user friendly for anyone to understand
9	H1-9: Prevent errors	No validation for student code or email domain		3	Add format validation + restrictions
10	H1-10: Help and documentation	Not clear that you should click on the class you want to enroll students to before clicking enroll students		1	Add a warning to complete an action first or an instruction on the page
